PROFESSIONAL SUMMARY

Entry-level ICT professional with a strong academic foundation in software development, databases, business information systems, application development, and technology-driven problem solving. Holds a **Diploma in Information and Communications Technology (NQF 6)** and an **Advanced Diploma in Application Development (NQF 7)** from Mangosuthu University of Technology. Gained practical industry exposure through Innovation Lab – MUT & The API House, supporting software-related systems, application functionality, structured data handling, testing, documentation, and digital workflows. Skilled in HTML, CSS, JavaScript, React, Ionic, Python, SQL, C#, and Java, with academic exposure to advanced databases, software testing, computer security, ICT management, systems development methodologies, and project management. A professional, adaptable, and detail-oriented candidate seeking to contribute within a corporate, technology, systems, data, or digital operations environment.

CORE COMPETENCIES

- Software Development Fundamentals
- Application Development & Support
- Database Fundamentals & SQL Querying
- Advanced Databases & Data Handling
- Business Information Systems
- Systems Analysis & Technical Problem Solving
- Web Development (HTML, CSS, JavaScript, React)
- Mobile / Hybrid App Development (Ionic)
- Python, C#, Java & JavaScript Fundamentals
- Software Testing & Debugging
- Computer Security Fundamentals
- ICT Management & Project Management Exposure
- Technical Documentation & Process Discipline
- Microsoft Office (Excel, Word, PowerPoint, Outlook)

EDUCATION

• **Advanced Diploma in Application Development (NQF 7)** – Mangosuthu University of Technology | Completed 2025
Key Academic Focus: Advanced Programming, Advanced Databases, Software Testing, Systems Development Methodologies, Research Methodologies, Computer Security, ICT Management, Project Management

• **Diploma in Information and Communications Technology (NQF 6)** – Mangosuthu University of Technology | Awarded 23 April 2025
Key Academic Focus: Programming, Web Development, Database Systems, Information Systems, Internet Programming, Technical Programming, System Software, IT Skills, Networking Fundamentals

• **Matric** – Greenfields Secondary School | 2020

PROFESSIONAL EXPERIENCE

Innovation Lab – MUT & The API House | IT Intern / Software & Systems Support | 2024 – 2025

- Supported software and application-related tasks within structured project environments
- Assisted with database-related tasks, structured data handling, and backend functionality
- Supported testing, debugging, and validation to improve system reliability and performance
- Maintained technical documentation and organised digital development records
- Assisted with web-based and application development tasks across practical project work
- Collaborated on system-related tasks and gained exposure to business IT workflows and digital processes

TECHNICAL PROFICIENCIES

- Programming Languages: C#, Python, JavaScript, Java, SQL
- Web Technologies: HTML, CSS, JavaScript, React
- Mobile / Hybrid Development: Ionic
- Databases: Microsoft SQL Server, MySQL
- Development Concepts: OOP, API Exposure, Backend Logic, Data Validation, Software Testing, Debugging

- Business / Systems Exposure: Information Systems, Technical Documentation, Structured Data Handling
- Productivity Tools: Microsoft Excel, Word, PowerPoint, Outlook
- Version Control: Git, GitHub

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- IBM SkillsBuild Certifications – AI, Cloud Computing, Cybersecurity, Blockchain, IoT & Database Fundamentals
- Ongoing professional development in software development, business systems, databases, and digital technologies

ADDITIONAL INFORMATION

- Available immediately
- Own reliable transportation
- Academic transcripts and supporting documents available upon request
