PROFESSIONAL SUMMARY

Highly motivated ICT professional with practical experience in technical operations, application support, software development and systems troubleshooting through the Innovation Lab – MUT & The API House (2023–Present). Holds an Advanced Diploma in Application Development (NQF 7) and a Diploma in ICT (NQF 6). Experienced with C#, .NET, Java, JavaScript, Python, Angular, SQL Server, Docker, Couchbase, Elasticsearch, Grafana, Prometheus, Kafka, Git and GitHub. Strong analytical, problem-solving and communication skills with a passion for monitoring, operational support and continuous improvement.

CORE COMPETENCIES

- Technical Operations Support
- System Monitoring
- Performance Analysis
- Application Support
- Incident Management
- Troubleshooting
- SQL & Database Administration
- Technical Documentation
- Software Development
- Analytical Thinking
- Problem Solving
- Attention to Detail
- Team Collaboration

PROFESSIONAL EXPERIENCE

Innovation Lab – MUT & The API House | Technical Operations & Software Development Intern | 2023 – Present

- Support software applications throughout the Software Development Life Cycle (SDLC).
- Monitor application behaviour and analyse system performance.
- Troubleshoot software defects and assist with resolving production issues.
- Write SQL queries and maintain Microsoft SQL Server databases.
- Develop and support applications using C#, .NET, Java, JavaScript and Python.
- Build web applications using Angular, React, HTML5 and CSS3.
- Use Git and GitHub for version control.
- Gain practical exposure to Docker, Grafana, Prometheus, Elasticsearch, Couchbase and Kafka.
- Prepare technical documentation, troubleshooting guides and operational records.
- Collaborate with developers to improve reliability and system performance.

EDUCATION

- Advanced Diploma in Application Development (NQF 7) – Mangosuthu University of Technology (Completed 2025)
- Diploma in Information and Communications Technology (NQF 6) – Mangosuthu University of Technology (Awarded 2025)
- Matric – Greenfields Secondary School (2020)

TECHNICAL SKILLS

- Programming: C#, Java, JavaScript, Python, SQL
- Frameworks: .NET, Angular, React
- Databases: Microsoft SQL Server, Couchbase, MySQL, Elasticsearch
- Monitoring: Grafana, Prometheus
- DevOps & Tools: Docker, Git, GitHub, Visual Studio, VS Code, NetBeans
- Messaging: Kafka
- Concepts: SDLC, OOP, REST APIs, Software Testing, Debugging, Application Support

CERTIFICATIONS

- IBM SkillsBuild – Artificial Intelligence, Cloud Computing, Cybersecurity, Blockchain, Internet of Things (IoT), Database Fundamentals
