PROFESSIONAL PROFILE

ICT professional with two years of structured practical experience gained through Work-Integrated Learning and a project-based industry programme at Mangosuthu University of Technology's Innovation Lab. Holds an **Advanced Diploma in ICT in Applications Development (NQF 7)** and a **Diploma in Information and Communications Technology (NQF 6)** from Mangosuthu University of Technology. Practical exposure across software development, application development and support, databases, web technologies, systems support, testing, troubleshooting and technical operations. Strong foundation in the software development lifecycle, programming, networking and ICT systems, with experience working across development and technology environments. Adaptable and technically versatile, with a broad foundation spanning software, databases, systems and digital technologies.

CORE COMPETENCIES

Software Development • Application Development & Support • Web Development • Database Management & SQL • Systems Support • Software Testing & Debugging • Technical Troubleshooting • SDLC • API Integration • Systems Analysis • Networking Fundamentals • Version Control • Incident Logging & Escalation • System Monitoring • Technical Documentation • IT Operations

EDUCATION

Advanced Diploma in ICT in Applications Development — NQF 7
Mangosuthu University of Technology | Completed 2025

Key Academic Modules: Advanced Programming • Advanced Databases • Software Testing • Systems Development Methodologies • Research Methodologies • Computer Security • ICT Management • Project Management

Diploma in Information and Communications Technology (ICT) — NQF 6
Mangosuthu University of Technology | Completed 2024

Key Academic Modules: Programming • Web Development • Database Systems • Information Systems • Internet Programming • Technical Programming • System Software • IT Skills • Networking Fundamentals

National Senior Certificate

Greenfields Secondary School | 2020

PROFESSIONAL EXPERIENCE

Innovation Lab — Mangosuthu University of Technology | Work-Integrated Learning Programme | 5 August 2024 – 25 July 2025

- Completed structured Work-Integrated Learning through the Innovation Lab, gaining practical exposure to software development, ICT systems and technology-driven project environments.
- Participated in software development lifecycle activities, including development, testing, debugging and validation.
- Worked with programming, web technologies, databases and structured data in practical project environments.
- Assisted with application functionality, backend processes and database-related tasks.
- Applied networking and general ICT knowledge to practical technical environments.
- Used development and version-control tools while maintaining technical documentation and project records.

Innovation Lab — Mangosuthu University of Technology | Project-Based Industry Programme | 4 August 2025 – 31 July 2026

- Completed a project-based industry programme as part of the Advanced Diploma in ICT in Applications Development, developing practical technology solutions for real-world clients through the Innovation Lab.
- Participated in the full software development lifecycle, from requirements and development through testing, troubleshooting and delivery.
- Worked across frontend, backend, database and application development activities.
- Applied Java, C#, Python and JavaScript to practical software development projects.
- Developed web-based solutions using HTML, CSS, React, Vite and Node.js.
- Worked with MySQL, MongoDB and Firebase for relational and non-relational data requirements.
- Used Git and GitHub for version control and collaborative development.
- Applied Linux, Docker and API-related technologies within project environments.

Key Project — Best Brightness Retail Solution: A retail technology solution incorporating an in-house Point-of-Sale (POS) system and an e-commerce component, providing practical exposure to retail technology, application development, databases and integrated digital systems.

TECHNICAL SKILLS

Programming: Java • C# • Python • JavaScript • SQL • C++

Web & Full-Stack: HTML • CSS • JavaScript • React • Vite • Node.js • APIs

Databases: MySQL • Microsoft SQL Server • MongoDB • Firebase • SQL • Database Design • Data Handling

Development & Tools: Git • GitHub • Docker • NetBeans • JGrasp • Ionic

Systems & Operations: Linux • Software Testing • Debugging • Troubleshooting • Incident Management • Technical Documentation

Monitoring: Grafana • Prometheus • Elasticsearch

Networking: Networking Fundamentals • Cisco Packet Tracer • Network Troubleshooting

Development Concepts: OOP • SDLC • Backend Logic • Data Validation • Systems Analysis • Application Development

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

IBM SkillsBuild: AI • Cloud Computing • Cybersecurity • Blockchain • IoT • Database Fundamentals

Ongoing professional development in software development, databases, business systems, cloud technologies and digital technologies.

ADDITIONAL INFORMATION

Available immediately • Own reliable transportation • Academic transcripts and supporting documentation available upon request
